

Wednesday Challenge Form

Group Members: Me, Erin

Problem Statement: Cad a capital “E” in Sketchup for a random group to fabricate, and then fabricate another group’s cad.

Approach: We designed our E to be easy to measure and cut out. Our fabrication, however, went disastrously wrong, as I looked at the wrong cad, and ended up making Keilah and Conner’s cad.

Solution: We were disqualified for making the wrong cad, and Keilah and Conner got 1st place.

Lessons Learned: Look at the correct cad
